

RECOGNIZE POST-SEPARATION ABUSE

Domestic violence abusers must change their tactics to achieve power and control after a survivor physically leaves. It is important for judicial professionals, attorneys, and providers to recognize these reinventions, in addition to the classic 12 DV tactics, in order to keep children and survivors safe post-separation. These behaviors, left unchecked, allow abusers to continue doing physical, emotional, psychological, legal, and financial harm. No one chooses or deserves to be the recipient of these behaviors:

4

Responding to a child's reasonable preference for the safe parent, due to abusive behaviors and lack of bonding, by making false claims of alienation. This is an offensive legal strategy, not based in fact or research, to continue to harm the safe parent.

5

Intimidation/Harassment/Stalking

Sending overwhelming number/length of emails, phone calls, and manipulative, threatening, and abusive messages. Monitoring whereabouts, interactions, social media, etc. via devices, online tools, or spyware. Using children to justify breaking protective orders. Harassing through 3rd parties.

6

Neglectful/Abusive Parenting

Exposing children to unsafe or inappropriate situations, content, or people with intent of creating concern and fear for the safe parent. Neglecting child during their time. Using violence in front of children or using violence, intimidation, threats, manipulation, and ridicule to gain compliance from the children. Placing own needs above the child's.
